

RHAZEL ALFORQUE

Full Stack Developer (Entry-Level)

russavenido@gmail.com | +63 927 352 4231 | 196 Tabada St, Cebu City, 6000 Cebu | russalforque.github.io/al4k

SUMMARY

Entry-level Full Stack Developer with a BSIT and hands-on experience building web applications using C#, ASP.NET Core MVC, .NET Web API, React, and SQL Server. Skilled in frontend and backend development, REST APIs, authentication, and database integration. Completed Accenture training in cloud architecture, Docker, DevOps, and Kubernetes. Seeking a Junior .NET Developer role to contribute to full-stack development and reliable software solutions.

WORK EXPERIENCE

- Accenture, App/Cloud Support Associate**06/2026 – 08/2026
 - Completed Accenture training in cloud data architecture, Docker, DevOps, and Kubernetes administration, gaining foundational knowledge of cloud architecture, containerization, container management, and modern application deployment practices.
 - Gained foundational knowledge of the Software Development Life Cycle (SDLC), including software development processes, testing, troubleshooting, and IT service management concepts.
- Alorica, Customer Service Representative**08/2025 – 02/2026
 - Provided customer support for account, order, and service-related inquiries, delivering timely resolutions and escalating complex issues when necessary.
 - Maintained high customer satisfaction by effectively managing high call volumes, troubleshooting user concerns, and adhering to service quality standards.
- A Guy I know Cebu – Inc., Web Developer Intern**01/2024 – 04/2024
 - Developed TaskFlow, a full-stack task management system using Vue.js, Laravel, MySQL, and Firebase Authentication, enabling secure user access and efficient task management.
 - Implemented real-time task updates, task categorization, and responsive UI features, while optimizing database performance to improve system speed by approximately 30%.

EDUCATION

Bachelor of Science In Information Technology, Asian College of Technology08/2021 – 06/2025

TECHNICAL SKILLS

Languages C#, TypeScript, JavaScript, HTML, CSS	Frameworks & Libraries ASP.NET Core MVC, .NET Web API, Entity Framework Core, React, Vue.js, Laravel, Tailwind CSS	Cloud & DevOps Docker, Kubernetes, Cloud Architecture Fundamentals	Mobile & Cross-Platform Capacitor
Databases SQL Server, MySQL	Tools Visual Studio, Git, GitHub	Core Skills CRUD, REST APIs, Authentication, Debugging, Responsive Design	

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Cloud Data Architecture: Cloud Architecture & Containerization July 2026	Using Docker for DevOps: Introduction to Docker July 2026	DevOps with Docker: Container Management July 2026	Kubernetes Administrator: Kubernetes Fundamentals for Administrators July 2026

PROJECT EXPERIENCE

- OJT Timesheet Monitoring System (Thesis Project), ASP.NET Core MVC | C# | SQL Server | Entity Framework Core | Bootstrap**
 - Developed a role-based OJT Timesheet Monitoring System using C# and ASP.NET Core MVC, with separate Admin and Trainee functionality for task assignment, timesheet management, attendance tracking, and reporting.
 - Integrated SQL Server and Entity Framework Core to support centralized data management and accurate attendance monitoring.
- SwiftWash — Laundry Management System, React | TypeScript | Tailwind CSS | .NET Web API | SQL Server**
 - Developed a laundry management system using React, TypeScript, and Tailwind CSS, with a .NET Web API backend and SQL Server database.
 - Implemented features for managing customer orders, laundry services, order status, and customer records.
- SwiftWash — Laundry Management System, React | TypeScript | Tailwind CSS | Capacitor | .NET Web API | SQL Server**
 - Developed a POS system using React, TypeScript, and Tailwind CSS, with a .NET Web API backend and SQL Server database.
 - Implemented features for managing sales transactions, products, inventory, customers, and reporting, with Capacitor integration for cross-platform application development.
