EDUCATION

ASIAN COLLEGE OF TECHNOLOGY

BS Information Technology

Major in Application Development

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Database Systems,
Web & Mobile Development

Cebu City
2025

WORK EXPERIENCE

ACCENTURE

App/Cloud Support Associate

Cebu City, Cebu
Jun 2026 – Aug 2026

- Completed training in cloud data architecture, Docker, DevOps and Kubernetes administrations
- Developed foundational knowledge of cloud architecture, containerization and modern application deployment practices
- Applied SDLC, testing, troubleshooting, and IT service management concepts in an enterprise environment

A Guy I know Cebu – Inc.

Web Developer Intern

Cebu City, Cebu
Jan 2024 – April 2024

- Developed a TaskFlow, a full-stack task management system using Vue.js, Laravel, MySQL, and Firebase Authentication
- Implemented real-time task updates, task categorization, secure authentication, and responsive UI features
- Optimized database performance and application functionality, improving system speed approximately 30%

PROJECTS

Sellix POS – Cross-Platform Point of Sale System

2026

- Engineered a full-featured, offline-first point-of-sale application for Android phones and tablets using React, TypeScript, Tailwind CSS, Capacitor, and SQLite
- Architected end-to-end retail workflows covering sales and checkout, inventory control, product and supplier management, customer records, and business reporting through a centralized dashboard
- Implemented role-based access control and shift management, enabling store owners to secure staff accounts and track cashier activity and accountability
- Integrated native Bluetooth hardware support for thermal receipt printers and cash drawers, with configurable receipt templates and real-time preview

Appointly – Online Booking & Scheduling System

2026

- Developed an online booking and scheduling platform for service businesses using React, TypeScript, and Tailwind CSS, deployed on Vercel
- Implemented a public booking page that lets customers view available time slots and schedule appointments online
- Built a shared calendar for managing and tracking appointments across staff, plus a customer list for storing and viewing client records

OJT Timesheet Monitoring System – Thesis Project

2025

- Developed a role-based OJT Timesheet Monitoring System using C# and ASP.NET core MVC, with separate Admin and Trainee functionalities
- Implemented task assignment, timesheet management, attendance tracking, and reporting features to streamline OJT monitoring
- Integrated SQL Server and Entity Framework Core for centralized data management and accurate attendance records

ADDITIONAL

Technical Skills: Proficient in JavaScript/TypeScript, React, Vue.js, C#, ASP.NET Core, Node.js, HTML/CSS, MySQL, and SQL Server; Familiar with Python, MongoDB, Git, Docker, Kubernetes, REST APIs, AWS, GCP, and CI/CD

Certifications: Cloud Data Architecture – Technical Cloud Accreditation; Using Docker for DevOps – DevOps Professional Series; Kubernetes Administrator – Cloud Native Computing Training; DevOps with Docker – Cloud Containerization Specialization · Languages: English(Intermediate), Filipino (Native)
